FM_CH	<p>Total number of children at home: Refers to the classification of the population according to whether or not the persons are members of a census family. Family persons refer to household members who belong to a census family. They, in turn, are further classified as follows: Spouses refer to persons of opposite sex who are legally married to each other and living in the same dwelling. Common-law partners are two persons of opposite sex or of the same sex who are not legally married to each other, but live together as a couple in the same dwelling. Lone parent refers to a mother or a father, with no spouse or common-law partner present, living in a dwelling with one or more children. Children refer to blood, step- or adopted sons and daughters (regardless of age or marital status) who are living in the same dwelling as their parent(s), as well as grandchildren in households where there are no parents present. Sons and daughters who are living with their spouse or common-law partner, or with one or more of their own children, are not considered to be members of the census family of their parent(s), even if they are living in the same dwelling. In addition, those sons and daughters who do not live in the same dwelling as their parent(s) are not considered members of the census family of their parent(s). The category of children can be further distinguished as follows: Never-married sons and/or daughters in a census family, as used in censuses prior to 2006. Other sons and/or daughters in a census family who would not have been included in the census family of their parents according to the previous concept. Grandchildren living in the same household as their grandparent(s), with no parents present. Non-family persons refer to household members who do not belong to a census family. They may be related to Person 1 (e.g. Person 1's sister, brother-in-law, cousin, grandparent), or unrelated to Person 1 (e.g. lodger, room-mate, employee).</p> <p>A person living alone is always a non-family person.</p>

Education

Variable Name	Description
<p>"Highest certificate, diploma or degree" refers to the highest certificate, diploma or degree completed based on a hierarchy which is generally related to the amount of time spent 'in-class.' For postsecondary completers, a university education is considered to be a higher level of schooling than a college education, while a college education is considered to be a higher level of education than in the trades. Although some trades requirements may take as long or longer to complete than a given college or university program, the majority of time is spent in on-the-job paid training and less time is spent in the classroom.</p>

Mobility

Variable Name	Description
<p>Mobility refers to the relationship between a person's usual place of residence and his or her usual place of residence one/five year earlier. Persons who have not moved are referred to as non-movers and persons who have moved from one residence to another are referred to as movers. Movers include non-migrants and migrants. Non-migrants are persons who did move but remained in the same city, town, township, village or Indian reserve. Migrants include internal migrants who moved to a different city, town, township, village or Indian reserve within Canada. External migrants include persons who lived outside Canada at the earlier reference date.</p>

Occupation

Variable Name	Description
	Kind of work done by persons aged 15 and over. Occupation is based on the type of job the person holds and the description of his or her duties. This classification is composed of four levels of aggregation. There are 10 broad occupational categories containing 47 major groups that are further subdivided into 140 minor groups. At the most detailed level, there are 520 occupation unit groups. Occupation unit groups are formed on the basis of the education, training, or skill level required to enter the job, as well as the kind of work performed, as determined by the tasks, duties and responsibilities of the occupation.

Ethnicity

Variable Name	Description	Data Set
	<p>Ethnic Origin Refers to the ethnic or cultural group(s) to which the respondent's ancestors belong. Ethnic or cultural origin refers to the ethnic 'roots' or ancestral background of the population, and should not be confused with citizenship or nationality.</p> <p>Ethnic origin data are very fluid, and counts for certain origins, such as 'East Indian' and 'Black,' may seem lower than initially expected. Users who wish to obtain broader response counts may wish to combine data for one or more ethnic origins together or use counts for ethnic categories such as 'South Asian origins' or 'African origins.' (Please note, however, that 'African origins' should not be considered equivalent to the 'Black' population group or visible minority status, as there are persons reporting African origins who report a population group or visible minority status other than 'Black.' Conversely, many people report a population group or visible minority status of 'Black' and do not report having 'African' origins.</p>	
ET_TOT_A	Total - Aboriginal identity for the population in private households. It represents the total population of Canada, excluding institutional residents. It also represents the sum of persons who reported single ethnic origins and multiple ethnic origins in the census.	pc_et1_19
ET_ABO	Aboriginal identity. Refers to those persons who reported identifying with at least one Aboriginal group, i.e. North American Indian, Métis or Inuit (Eskimo), and/or those who reported being a Treaty Indian or a Registered Indian as defined by the Indian Act of Canada and/or who were members of an Indian Band or First Nation. Included in the Aboriginal population are those persons who reported identifying with at least one Aboriginal group, that is, 'North American Indian', 'Métis' or 'Inuit (Eskimo)', and/or who reported being a Treaty Indian or a Registered Indian, as defined by the Indian Act of Canada, and/or who reported they were members of an Indian Band or First Nation.	pc_et1_19
